Boston Partners

Appendix

Mid Cap Value

Performance disclosures

Boston Partners Global Investors, Inc. ("Boston Partners") is an Investment Adviser registered with the Securities and Exchange Commission under the Investment Advisers Act of 1940. Registration does not imply a certain level of skill or training. Boston Partners is an indirect, wholly owned subsidiary of ORIX Corporation of Japan ("ORIX"). Boston Partners updated its firm definition as of November 2018 to reflect changes in its divisional structure. Boston Partners is comprised of two divisions, Boston Partners and Weiss, Peck & Greer Partners ("WPG").

Boston Partners claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Boston Partners has been independently verified for the periods 1995 through 2023. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Boston Partners Mid Cap Value composite has been examined for the periods 1995 to 2006 and 2010 to 2023. The verification and performance examination reports are available upon request.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of content contained herein. Past performance is not indicative of future results. This document is not an offering of securities nor is it intended to provide investment advice. It is intended for informational purposes only.

The inception and creation date of the Boston Partners Mid Cap Value composite is May 1, 1995. The composite includes all fully discretionary, fee-paying accounts under management, both separately managed and commingled, with a similar investment mandate.

Composite returns are provided on a gross and net of fees basis. Net of fee composite returns reflect the deduction of management fees, commissions, and transaction costs, and are calculated by deducting actual fees charged to composite accounts. Net of fees returns for commingled vehicles that are members of a composite are calculated using a model fee that is the highest tier in the separate account fee schedule

for the strategy. Gross composite returns are calculated by deducting commissions and transaction costs charged to composite accounts. Fees may vary depending on, among other things, the applicable fee schedule and portfolio size. Composite returns are asset weighted and composite account returns are calculated on a total return, time-weighted basis using trade date valuations. Returns reflect the reinvestment of dividends and other earnings, and performance is expressed in U.S. Dollars. Additional information regarding the Firm's list of composite descriptions, policies for valuing portfolios, calculating performance, and presenting compliant presentations is available upon request.

Benchmark

Effective January 1, 2005 the BP Mid Cap Value composite revised its benchmark from the Russell 2500 Value Index to the Russell Midcap Value Index. The Russell Midcap Value Index has less of a bias toward smaller capitalization stocks and thus more accurately reflects the composition of BP holdings. The Russell Value Indices typically measure the performance of universes of stocks displaying low price-to-book ratios and low forecasted growth values. The Russell 2500 Value Index measures the performance of those Russell 2500 companies with lower price-to-book ratios and lower forecasted growth values. Index returns are provided for comparison purposes only to show how the composite's returns compare to a broad-based index of securities, as the indices do not have costs, fees, or other expenses associated with its performance. In addition, securities held in either index may not be similar to securities held in the composite's accounts.

Composite dispersion

The measurement of composite dispersion is calculated by the weighted average standard deviation of the annual account returns within the composite. Dispersion in composites with less than five accounts included for the entire year is not considered meaningful and is denoted with "N/A". The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period.

Mid Cap Value:

	# of Accts. in Comp.	Total Assets in Comp.	Comp. Dispersion	Comp. 3-Yr. Std. Dev.	Bench. 3-Yr. Std. Dev.	% of Firm AUM
2024:	39	\$29.8 bn	0.03%	18.78%	19.77%	28%
2023:	32	\$27.6 bn	0.09%	18.61%	19.31%	29%
2022:	33	\$25.0 bn	0.07%	23.89%	24.44%	28%
2021:	33	\$28.0 bn	0.09%	21.73%	21.95%	29%
2020:	36	\$18.9 bn	0.05%	22.45%	22.62%	25%
2019:	40	\$20.0 bn	0.04%	13.25%	12.79%	22%

2020:	\$77,120	2015:	\$78,363

Other Disclosures

Boston Partners has adjusted the S&P and Russell sector classifications to group stocks according to similar business product lines and correlation of stock returns. Boston Partners classifications are similar to the major market indices in terms of breadth but may differ in terms of composition. All product characteristics and sector weightings are calculated using a representative portfolio. Risk statistics are calculated using composite data. Portfolio composition is subject to change and information contained in this publication may not be representative of the current portfolio. Effective 1/1/2011 Boston Partners adopted a significant cash flow policy for this composite in accordance with the Global Investment Performance Standards. If an external cash flow is greater than or equal to 10.0% of the beginning market value of the portfolio on the day of the flow, and greater than or equal to 10.0% of the beginning market value of the composite for that month then the portfolio is removed from the composite for the month that the flow occurred. The portfolio is then placed back into the composite in accordance with Firm's inclusion policies and procedures.

Mid Cap Value

Performance disclosures (continued)

Boston Partners participates in Initial Public Offerings (IPOs) as described in its Form ADV, Part II. IPO contributions to performance vary from year-to-year depending on availability and prevailing market conditions. IPO contributions may have a significant positive effect on performance when initially purchased. Such positive performance should not be expected for future performance periods.

Annual Fee Schedule

Investment advisory fees, which are more fully described in Boston Partners Form ADV Part II are: 80 basis points (“bp”) on the first \$25 million of assets; 60 bp thereafter.

Corporate Information

Boston Partners is affiliated with listed corporations through common ownership. ORIX Corporation Europe N.V. services may be offered in the U.S. through Robeco Institutional Asset Management, U.S., an SEC Registered Investment Adviser registered under the Investment Advisers Act of 1940. Transtrend products may be offered in the U.S. through Boston Partners Securities, LLC, member FINRA, SIPC. Boston Partners is authorized to transact as an Investment Adviser and maintains a Securities License by the Government of Guam Department of Revenue and Taxation. It also maintains a Certificate of Authority to transact business in Guam as a Foreign Corporation. In addition, Boston Partners is registered in Korea with the Financial Services Commission (FSC).
